

PREPARING FOR CLINICAL TRAINING

PRO MAX System with All Handpieces

DAY OF TRAINING

- Schedule 2-3 demo patients (recommended: staff, family, or friends)
- Do not schedule paying patients for the training day.
- Allow ~ 1 hour per treatment for initial patients.
- All staff involved in patient care should attend the full session
- Prior RF or Laser experience does not exempt staff from this training.

SUPPLIES NEEDED FOR TRAINING

- ☐ Topical anesthetic (BLT or Lidocaine)
- ☐ Gentle cleanser or makeup remover
- ☐ Tetracaine
- ☐ Cold packs or cooling prep
- ☐ 4x4 gauze
- ☐ After-treatment laser balm
- ☐ Tongue depressor
- ☐ White Botox pencil
- ☐ Headband

CONTRAINDICATIONS FOR TREATMENT

Patients should NOT be treated with RF/laser if they:

Medical History/Health Conditions:

- Took Accutane™ (isotretinoin) in the past 12 months
- Have a history of keloids, poor wound healing, or type 1 diabetes
- Have an implanted medical device or pacemaker
- Are pregnant or breastfeeding
- Have a history of HSV without pre-medication

Recent Cosmetic Procedures:

- Have had Botox <1 week, Filler <2 weeks, or PDO threads <6 weeks ago
- Have had RF, Laser, or CO2 within the past 4 weeks

External Factors:

- Have been in the sun/tanning bed within the last 2 weeks
- Exhibit unusual skin reaction on patch test
